Product Overview

Efficient Surface Preparation

This paint and rust stripper kit is engineered for high-performance surface preparation, making it an essential tool for removing stubborn coatings, rust, and paint from various materials. Featuring durable abrasive flaps arranged radially around a central hub, the design ensures consistent and controlled material removal for a uniform finish. It is an ideal solution for metalworking, automotive restoration, and general surface cleaning tasks, designed to enhance efficiency and extend the lifespan of your equipment.

Application & Use

Primary Applications

Metalworking, Automotive Restoration, Surface Cleaning, Paint Removal, Rust Stripping

Technical Features

Design Features

- Radial abrasive flap arrangement
- Central hub mounting
- Consistent material removal
- Durable construction

Equipment Compatibility

Compatible Equipment

Air Compressor • Surface Preparation Tools
