

# Paint and Varnish Removal Disc

This grinding disc is designed for the efficient removal of paint and varnish from surfaces. Its durable construction ensures extended use and saves time on surface preparation.

## ADDITIONAL IMAGES

## Product Overview

### Efficient Surface Preparation

This specialized grinding disc is engineered for the rapid and efficient removal of paint and varnish from a variety of surfaces. Its durable construction ensures extended service life, making it a reliable choice for professional surface preparation tasks. Designed for compatibility with standard angle grinders, it effectively balances aggressive material removal with surface protection.

## Technical Specifications

### Dimensions

**115 mm**  
Diameter

**22.2 mm**  
Arbor Hole

Article Number

800.02

## Applications

Compatible Industries

Woodworking, Metalworking, Automotive Refinishing

## Features

### Key Performance Benefits

- Fast material removal
- Time-saving operation
- Durable construction
- Minimized surface damage
