

Painted Open End Blind Rivet

This painted blind rivet features an open end type construction. It is designed for fastening applications in machinery and industrial parts, offering a painted finish for corrosion resistance.

Product Overview

Painted Open End Blind Rivet

This open end blind rivet is engineered for reliable fastening in various industrial applications, including machinery and textile equipment assembly. The inclusion of a durable painted finish provides enhanced corrosion resistance while maintaining a clean aesthetic for finished products. Its open end design ensures straightforward insertion and consistent, secure fastening performance.

Technical Specifications

Fastener Type	Open End Blind Rivet
Finish	Painted

Application

Key Features

- Open end construction for easy insertion
- Corrosion-resistant painted finish
- Secure fastening mechanism
- Suitable for industrial and machinery assembly

Primary Applications	Machinery, Industrial Parts, Apparel Machinery, Textile Machinery
----------------------	---
