

Pallet Stretch Wrapping Machine

This pallet stretch wrapping machine is designed for securing palletized loads using stretch film. It features a rotating platform and adjustable film tension for optimal wrapping performance.

Overview

Industrial Pallet Stretch Wrapper

This advanced pallet stretch wrapping machine is designed to improve packaging quality and efficiency while significantly reducing film material waste. Featuring customizable tension controls and adjustable speed settings, it ensures load stability for a variety of industrial pallets. The robust construction and integrated safety systems make it a reliable choice for high-volume warehousing and logistics operations.

Performance Metrics

Performance Specifications

2000 kg Max Weight Capacity	250 % Pre-stretch Tension	2400 mm Max Wrapping Height
---------------------------------------	-------------------------------------	---------------------------------------

Technical Specifications

Technical Data

Parameter	Value
Turntable Diameter	1500mm / 1800mm
Max Wrapping Area	1300 x 1300mm
Turntable Speed	2-15 rpm

Features

Operational Advantages

- Automatic film cutting for time efficiency
- Photocell sensor for automatic load height detection
- Soft start and stop mechanism to prevent load tipping
- Integrated U-model chassis for enhanced durability
- Belt-driven carriage for reduced noise and maintenance

Safety & Design

Self-protection switch, Emergency stop, Turntable orientation, Modular maintenance design
