

Palm Tree Pruning Saw

This palm tree pruning saw is a specialized gardening tool designed for maintaining palm trees and similar vegetation. It features an extended reach and a precision saw blade for efficient and clean cuts.

Product Overview

Professional Palm Tree Pruning Solution

This specialized pruning saw is engineered to handle the unique challenges of palm tree maintenance. Featuring a curved blade design optimized for the natural bending angle of palm leaves, it ensures efficient and clean cuts. The tool is built for durability with high-quality 65Mn steel and a reinforced gearbox, making it a reliable choice for professional landscaping tasks.

Technical Specifications

Blade Material	65Mn Steel
Max Branch Diameter	35 mm
Blade Features	Curved Design, Stagger Cutting Edge, Heat Treated

Performance & Compatibility

Performance Metrics

35 mm

Max Cutting Diameter

Compatible Attachments

- Brush Cutter
- Long Reach Pruner
- Hedge Trimmer

Gearbox Status

Strengthened Gearbox • High Reciprocating Frequency
