

Panel Mount DC Buzzer

This is a panel mount buzzer designed for audible signaling applications. It operates on a 12-24VDC power supply and features robust construction for durability.

Overview

Reliable Audible Signaling

This panel mount DC buzzer is engineered for clear and consistent audible signaling in demanding environments. Designed to operate on a flexible 12-24VDC power supply, it provides a reliable 87dB(A) output for attention-grabbing alerts. Its robust construction makes it an ideal solution for automotive, industrial, and electronic integration projects.

Technical Specifications

Sound Level

87 dB(A)
Sound Output

Model Identifier

FM161A

Operating Voltage

12-24V DC

Alarm Mode

Continuous

Mounting Type

Panel Mount
