

Panel Mount Timer Relay

This panel-mounted timer relay is designed for industrial control applications. It features a rotary dial for precise time setting and supports multiple timing modes.

Product Overview

Industrial Timer Relay

The H3CR-A8 is a compact, panel-mounted timer relay engineered for precise industrial control applications. It features an intuitive rotary dial for easy time setting and a front-panel switch for selecting multiple timing modes. Designed for reliability, the unit includes clear LED indicators for power and output status, making it an ideal solution for demanding environments requiring repeatable timing sequences.

Technical Features

Interface Controls

- Rotary dial for time setting
- Front-panel mode selection switch

Mounting Style	Panel Mount
Indicators	Power LED, Output LED
