

# Paper Cup Sleeve Forming Machine

This machine forms paper sleeves for ripple cups. It utilizes precise mechanisms for paper feeding, gluing, and forming to efficiently produce ripple sleeves.

## ADDITIONAL IMAGES

## Product Overview

### Professional Ripple Cup Sleeve Forming

The JNW-D Paper Cup Sleeve Forming Machine is a specialized solution designed for the efficient production of ripple cup sleeves. Engineered for small to medium-scale operations, it combines robust construction with precise mechanical assemblies for consistent feeding, gluing, and forming. This unit provides reliable performance for businesses looking to enhance their custom paper cup packaging capabilities.

## Performance Specifications

### Rated Productivity

**32 pcs/min**  
Min Speed

**45 pcs/min**  
Max Speed

## Technical Details

### Compatible Cup Sizes

6-12oz

### Paper Material

Coated duplex board with grey back (200-300g/m2)

## Electrical Requirements

### Power Requirements

| Parameter      | Value     |
|----------------|-----------|
| Supply Voltage | 380V/50Hz |
| Total Power    | 4KW       |

## Physical Dimensions

|                      |                  |
|----------------------|------------------|
| Total Weight         | 1000 kg          |
| Packing Size (L*W*H) | 2450x1260x2000mm |
