

Paper Insulated Electrical Wire

This insulated wire features a paper covering for electrical applications needing insulation and protection. It is available in various gauges and lengths to meet diverse wiring requirements.

Product Overview

Paper Insulated Electrical Wire

This paper insulated electrical wire is designed for specialized electrical applications requiring robust insulation and environmental protection. The paper covering acts as a reliable barrier, ensuring safety and performance in demanding electrical systems. Available in both non-impregnated and impregnated varieties, this wire offers flexible temperature ratings to suit specific operational needs.
