

Paper Processing Equipment

This equipment is used in the processing of paper. It facilitates converting, slitting, and winding of paper products.

Product Overview

Heavy-Duty Cleaning Performance

This high-pressure washer is engineered for demanding cleaning tasks, offering a robust solution for professional maintenance. Mounted on a portable, wheeled frame, the unit provides excellent mobility for varied job sites. It features a reliable gasoline-powered engine and a high-pressure hose system, delivering consistent cleaning power for tough surfaces.
