

Paper Processing Machinery

This paper machinery is designed for efficient and precise paper processing. It features a robust construction and advanced control systems to ensure high-quality output.

Overview

High-Efficiency Slitter Rewinder

This paper processing machinery is designed for efficient and precise paper handling, featuring robust construction and advanced control systems to ensure high-quality output. Ideal for various paper production applications, the machine offers reliable performance with adjustable settings for different paper types and sizes. It includes automated feeding and cutting mechanisms, alongside a user-friendly interface for seamless monitoring and control in continuous operation environments.

Technical Specifications

Slitting Width	1300 mm
Max. Diameter of Unwinding	1000 mm
Max. Diameter of Rewinding	600 mm

Performance Metrics

Slitting Speed

150 m/min

Max Speed

Slitting Thickness Range	40-450 GSM
--------------------------	------------

Machine Details

Machine Power	7.5 KW
Machine Weight	2.5 T
Machine Dimensions	3000 x 2100 x 1700 mm

Compliance

H.S. Code	8441309000
