

Parabolic Leaf Spring

This parabolic leaf spring is designed for optimal suspension and load-bearing capabilities. It features a multi-leaf design with a progressive spring rate, providing a smooth ride and excellent stability.

Product Overview

High-Performance Suspension Solution

This parabolic leaf spring is specifically engineered for trailer and RV applications, offering superior load-bearing capabilities compared to standard designs. Featuring a multi-leaf construction with a progressive spring rate, it delivers a notably smoother and more comfortable ride experience. Built from high-quality steel, it ensures durability and long-lasting performance for demanding automotive suspension needs.

Technical Specifications

Design Features

- Parabolic multi-leaf design
- Progressive spring rate
- High-strength steel construction

Primary Application

Trailer, RV, Automotive
