

Paracetamol BP93/USP23

Paracetamol BP93/USP23 is a pharmaceutical product. It meets the quality standards of BP93 and USP23.

Product Overview

High-Quality Pharmaceutical Grade Paracetamol

This product is a pharmaceutical-grade Paracetamol, manufactured to meet both BP93 (British Pharmacopoeia 1993) and USP23 (United States Pharmacopoeia 1993) standards. It serves as a fundamental active pharmaceutical ingredient (API) suitable for various medicinal formulations. This high-purity compound is designed to meet strict international quality requirements for pharmaceutical manufacturing.
