

Particulate Filter Mask

This particulate filter mask is a respiratory protection device. It features a multi-layer filtration system and adjustable head strap.

Product Overview

Respiratory Protection Solution

The HM201 Filter Mask is a professional-grade respiratory protection device engineered to effectively filter particulate matter from the air. It utilizes a multi-layer filtration system designed to protect against dust, pollen, and various airborne contaminants while maintaining low breathing resistance. With a durable, lightweight frame and adjustable head straps, this mask ensures a secure, comfortable fit for extended use in demanding environments.

Key Features

Design Highlights

- Multi-layer filtration system
- Durable, lightweight frame
- Adjustable head strap
- Replaceable filter design

Filtration Targets

Dust, Pollen, Airborne Contaminants

Applications

Recommended Use Cases

Construction • Woodworking • General DIY

Performance

Breathing Resistance
