

Passenger and Cargo Three-Wheeled Bicycle

This three-wheeled bicycle is designed for carrying either passengers or cargo. It features a robust frame, a single front wheel, and a rear carriage with two wheels for enhanced stability.

Product Overview

Versatile Three-Wheeled Transportation

This three-wheeled bicycle is engineered for dual-purpose utility, serving effectively as both a passenger transport and a cargo carrier. Featuring a robust frame design, it ensures stability and durability for various commercial or personal applications. With its distinctive red body, comfortable black seating, and integrated headlight, it provides a practical and reliable solution for short-distance transport needs.
