

Passenger City Bus

This passenger bus is designed for urban public transportation. It offers a comfortable and efficient way to transport passengers within a city environment.

Overview

Modern Passenger City Bus

This modern passenger city bus is designed for efficient public transportation and comfortable urban commuting. Featuring a distinctive blue exterior with a contemporary geometric design, the vehicle is optimized for high-capacity passenger transit. With large windows for visibility and a standard, reliable configuration, it provides a professional solution for city transit authorities and tour operators.
