

Passive Home Theater Subwoofer

This passive subwoofer is designed to enhance the low-frequency response of any audio system. It has a rated power of 60W and a frequency response of 40 ~ 150Hz.

Product Overview

Professional Passive Subwoofer

This passive subwoofer is engineered to deliver deep, immersive low-frequency audio to any home theater or professional sound system. Housed in a durable wooden enclosure, it effectively minimizes resonance to ensure clear and punchy bass performance. With its compact footprint and stable design, it integrates seamlessly into various room configurations to enhance your overall listening experience.

Technical Specifications

Rated Power	60 W
