

# Passive Welding Helmet with Flip-Up Lens

This welding helmet is designed to provide eye and face protection during welding. It features a flip-up lens that allows for easy inspection of the workpiece.

## Product Overview

### Professional Protection

This passive welding helmet is designed to provide comprehensive eye and face protection during welding operations. Featuring a convenient flip-up lens, it allows for easy inspection of the workpiece without removing the helmet. The lightweight construction ensures comfort during extended use, while the durable materials are built to withstand demanding industrial environments.

## Safety & Compliance

UV/IR Protection	Up to Shade 16
Safety Standards	ANSI Z87.1, CSA Z94.3

## Features

### Coverage Area

- Full Face
- Front of Neck

### Design Highlights

Lightweight • Wide Viewing Area • Adjustable Headgear

Lens Type	Flip-up
