

Patient Monitoring Leadwires

These leadwires are designed for patient monitoring applications. They include SpO2 sensors, ECG cables, IBP cables, and temperature probes.

Overview

Professional Patient Monitoring Solutions

This comprehensive range of medical cables and sensors is designed for high-precision patient monitoring environments. The collection includes versatile SpO2 sensors, ECG cables with leadwires, IBP cables, and temperature probes, ensuring compatibility with a wide array of clinical instruments. Engineered for reliability and patient comfort, these components are essential for accurate data transmission in hospital and clinical settings.

Certifications & Compliance

Certifications

CE, ROHS

Product Range

Available Sensor Types

- Adult finger clip SpO2 sensors
- Adult silicone tip SpO2 sensors
- Child finger clip SpO2 sensors
- Pediatric silicone wrap SpO2 sensors
- Ear clip sensors

Compatibility

Compatible Instrument Connectors

- Philips compatible connectors
- Novamatrix 7-pin compatible
- Datascope 9-pin compatible
- General 7-pin compatible

Technical Specifications

Available Components

SpO2 Sensors • ECG Cables • IBP Cables • Temperature Probes • Trunk Cables • Leadwires
