

Patrol Motorcycle with V-Twin Engine

This motorcycle is designed for patrol and escort duties. Its liquid-cooled, V-twin engine delivers reliable power, while integrated storage compartments and emergency lights enhance its functionality.

Overview

Designed for Duty

The JL250V is a specialized motorcycle engineered specifically for patrol and escort operations. Featuring a reliable liquid-cooled V-twin engine, it delivers the consistent power and smooth performance required for demanding professional environments. Its robust construction, combined with integrated storage and emergency signaling systems, makes it a dependable asset for security and law enforcement agencies.
