

PC Case for ATX and Micro-ATX Motherboards

This PC case is designed to house and protect the internal components of a desktop computer. It features a standard form factor suitable for ATX and Micro-ATX motherboards.

Overview

Versatile Desktop Chassis

This PC case is engineered to provide a durable and reliable housing for desktop computer components, supporting both ATX and Micro-ATX motherboard configurations. It features a well-organized layout with multiple drive bays for HDD and SSD storage, alongside integrated cooling solutions to ensure optimal thermal performance. The front panel includes accessible USB and audio ports, making it an ideal choice for professional and home office builds.
