

PC PET Film Crushing Washing Drying Palletizing Line

This production line efficiently crushes, washes, dries, and palletizes PC and PET film. The system is engineered for high throughput and consistent quality in recycling and processing applications.

System Overview

Integrated Recycling Solution

This production line is a comprehensive solution designed for the efficient crushing, washing, drying, and palletizing of PC and PET film. It features a robust crushing unit paired with an advanced washing system and high-performance drying mechanism to ensure superior material quality. Engineered for industrial recycling and processing plants, the system delivers high throughput and consistent performance throughout the entire lifecycle of the material processing.

Compatible Materials

PC Film, PET Film

Key Features

Integrated Processing Steps

- Crushing
- Washing
- Drying
- Palletizing

Operational Performance

1 High

System Throughput

1 High

Processing Consistency
