Product Overview

High-Performance Thin Client Solution

This compact PC station is engineered to facilitate seamless remote computing, acting as an efficient terminal to access host servers for resource-intensive tasks. Specifically optimized for 3D gaming and multi-user environments, it allows organizations to centralize computing power while maintaining a lightweight desktop presence. Its energy-efficient design ensures reliable performance across diverse professional applications.

Technical Specifications

Performance Features

- Supports 3D gaming applications
- PC resource sharing capabilities
- Server-based computing environment
- Centralized data management

Design

Compact • Energy-efficient • Lightweight

Interface Connectivity

VGA Video Output, USB Ports, LAN Network Port, Audio Input, Audio Output
