

PCB Backup Pin Assembly Support Pins

These are support pins designed for PCB backup pin assembly. They are used in PCB drilling machine applications.

Product Overview

Precision PCB Backup Support

These backup pin assemblies are engineered to provide critical support for printed circuit boards during assembly processes. Designed for stability and precision, they ensure consistent board positioning to maintain high-quality manufacturing standards. This component is essential for maintaining alignment during automated assembly operations.

Technical Details

Part Number	E20217150A0
Component Type	Backup Pin Assembly Support Pins

Logistics

Quantity	6
Warehouse Location	2H86
Reference Number	C00023112-023
Shipping Destination	CT-B073
