

PCB Mount Connector

These PCB jacks are designed for use in various applications requiring connection to printed circuit boards. They feature gold plating options of 3¼", 6¼", 15¼", 30¼", and 50¼" for optimal conductivity and corrosion resistance.

Overview

Professional PCB Mount Connectors

These PCB mount connectors are engineered for high-performance applications in telecommunications and electronic devices. Designed to ensure reliable signal integrity, the series features robust construction and versatile gold plating options to suit various environmental requirements. They provide a secure and stable connection, making them an ideal choice for critical printed circuit board assemblies.

Technical Specifications

Model Series

- RF-0601
- RF-0602
- RF-0603
- RF-0604
- RF-0605
- RF-0606
- RF-0607
- RF-0608
- RF-0609

Gold Plating Thickness

3¼", 6¼", 15¼", 30¼", 50¼"

Applications

Recommended Applications

Telecommunications • Electronic Devices • PCB Assembly
