

PCB Mountable Terminal Block

This PCB mountable terminal block enables secure electrical connections on printed circuit boards. It features screw terminals that allow for easy and reliable wire attachment.

Overview

Professional PCB Terminal Block

This PCB mountable terminal block is designed for reliable and secure wire connections in electronic assemblies. With a 5.00mm pitch and robust insulation properties, it ensures stable performance across a wide range of operating temperatures. It is a versatile component suitable for diverse circuit board applications requiring durable connectivity.

Electrical Specifications

Rated Current

8 A

Rated Current

Rated Voltage

300 V

Rated Voltage

Insulation Impedance

5000 M Ω

Withstand Voltage

AC2000V/1Min

Physical Characteristics

Available Pole Configurations

- 2P
- 3P
- 4P - 30P

Pitch / Spacing

5 mm

Wire Diameter Range

14~26 AWG

Environmental

Working Temperature Range

-33 to +120
