

PCB Mountable Terminal Block

This PCB terminal block is designed for mounting on printed circuit boards. It uses screw-down terminals to secure wires, ensuring a reliable electrical connection.

Overview

Reliable PCB Connectivity

This PCB mountable terminal block is designed to provide secure and organized electrical connections for printed circuit board assemblies. Featuring a 5.00mm pitch, it supports a wide range of wire diameters from 14 to 26 AWG, making it versatile for various electronic applications. The robust construction ensures reliable performance under demanding conditions, with a wide operating temperature range and high insulation impedance.

Electrical Specifications

Rated Current

16 A

Rated Current

Rated Voltage	250 V
Insulation Impedance	5000M © / 1000
Withstand Voltage	AC2000V / 1Min

Mechanical Specifications

Available Pole Configurations

- 2P
- 3P to 30P

Pin Spacing (Pitch)	5 mm
Wire Diameter Range	14-26 AWG
Stripping Length	100 cm
Torsion	20

Environmental

Working Temperature	-33°C to +120°C
