Product Overview

Professional Surface Preparation Solution

This high-performance PCD grinding block is engineered for aggressive material removal on concrete and stone surfaces. Designed to efficiently strip away tough coatings such as epoxy, varnish, glue, paint, and black tar adhesive, it ensures a smooth and leveled finish. With its robust construction and high-quality diamond segments, it offers exceptional durability for heavy-duty floor preparation tasks.

Technical Specifications

Segment Size	40 x 10 x 14 mm
Number of Segments	2-8 segments
Material Composition	45# Steel, Alloy, Diamond, PCD

Compatibility & Usage

Available Connections

- ~~Æ16mm~~
- ~~Æ20mm~~
- ~~Æ22.23mm~~
- M14
- M16
- 5/8"-11

Primary Applications

Epoxy Removal • Glue Removal • Paint Stripping • Concrete Leveling • Resin Removal

Logistics

Monthly Supply Ability

30000 pcs

Pieces per Month

Typical Lead Time

3-7 days after payment
