

PE 45 Degree Elbow Fitting Injection Mold

Injection mold designed for creating PE 45-degree elbow fittings. This mold ensures precision and quality in producing fittings for joining PE pipes.

Product Overview

Precision PE Injection Molding Solutions

This high-performance injection mold is engineered for the production of 45-degree PE elbow fittings. Designed for reliability and longevity, the mold features high-grade steel construction for both core and cavity, ensuring consistent part quality. It is an ideal solution for manufacturers seeking efficient, high-volume production with a proven track record of durability.

Technical Specifications

Mould Lifetime

600000 shots

Minimum Shots

850000 shots

Maximum Shots

Steel Materials	P20, 2316, 718, 2738
Mould Base	S45C
Runner System	Cold runner

Logistics & Shipping

Container Specifications

Container Type	Dimensions	Max Weight	Volume
20 Foot	5.90m x 2.34m x 2.38m	17.5 T	24-26 stere
40 Foot	11.95m x 2.34m x 2.38m	22 T	54 stere

Business Terms

Quality Standards

ISO9001:2008

Warranty & Support

- One year warranty
- Lifelong after-sales services

Minimum Order Quantity	1 set
Delivery Lead Time	50 working days
