Product Overview

High-Speed PE Film Shrink Wrapping Solution

This PE film shrink wrapping machine is engineered for high-speed packaging requirements, specifically optimized for bottled beverages including purified water, soft drinks, juice, and dairy products. It features an automated workflow with programmable controller integration, ensuring consistent efficiency and time-saving operation. The system utilizes constant-temperature sealing and cutting with a Teflon-coated knife for flat, firm seals, while the intuitive touch screen interface simplifies man-machine communication.

Operational Features

Automation Level

Automatic • Programmable

Safety Features

- Emergency stop buttons
- Protective guarding around moving parts

Control Interface

Touch screen

Sealing Technology

Constant temperature sealing and cutting with Teflon-coated knife

Industry Applications

Suitable Industries

Beverage, Food, Pharmaceutical, Consumer Goods

Packaging Capabilities

Suitable for different bottleneck sizes and combination packaging
