

Peanut and Almond Slivering Machine

The peanut and almond slivering machine efficiently cuts peanuts and almonds into strips. Its stainless steel construction ensures hygiene and longevity for high-volume food processing.

Product Overview

High-Efficiency Nut Slivering Solution

This specialized machine is engineered for the precise cutting of peanuts and almonds into uniform strips. Constructed from high-quality, durable stainless steel, it is built to meet the rigorous hygiene standards required in professional food processing environments. The unit features a continuous feeding hopper and pneumatic cutting action, ensuring consistent output and high-volume capability for food manufacturers.

Technical Specifications

Construction Material	Stainless Steel
Processable Materials	Peanuts, Almonds
Cutting Method	Pneumatic Cylinder Action

Operational Features

Adjustable Settings

- Adjustable strip thickness

Feeding System	Continuous Hopper Feed
Mobility	Yes
Mobility Details	Equipped with caster wheels for easy facility layout adjustment
