

Peanut Strip Cutting Machine

The peanut strip cutting machine is specialized equipment designed for precisely cutting peanuts into strips. It features a hopper, vibration feeder, cutter, and cutting roller, making it ideal for processing half-peanut kernels.

Product Overview

Industrial Peanut Strip Cutting Solution

This industrial-grade peanut strip cutting machine is engineered for high-efficiency processing, transforming whole peanuts into precise strips. Built with durable stainless steel, it meets rigorous hygiene standards suitable for food processing plants and agricultural facilities. The design incorporates a continuous feeding hopper and an adjustable blade system to ensure consistent output while effectively reducing manual labor costs.

Technical Specifications

Key Features

- Adjustable cutting blades
- Continuous feeding hopper
- Discharge chute
- Emergency stop mechanism
- Protective safety guards

Material	Stainless Steel
