Product Overview

Pedestal Mounted Warping Roller

This warping roller is specifically engineered for marine applications, providing a reliable solution for cable and rope handling on ships and peripheral equipment. Built to meet the DIN 81907 standard, it features a robust pedestal base that ensures secure mounting and long-lasting stability in demanding maritime environments. The unit is constructed from durable steel and finished with a protective surface blasting and primer treatment for enhanced corrosion resistance.

Technical Details

Design Standard	DIN 81907
Material	Steel
Surface Finish	Blasting, Primer

Logistics and Production

Production Capacity

1000 Piece
Units per Month

Packaging Details

- Iron Frame
- Steel plate

Delivery Time	10-30 days
