

Pepsin Enzyme Powder

Pepsin is a proteolytic enzyme used in various industrial applications. Its purity and activity levels are critical parameters for its intended use.

Product Overview

High-Purity Pepsin Enzyme

Pepsin is a powerful proteolytic enzyme essential for various biochemical research and industrial applications. This high-quality powder form ensures ease of handling and consistent performance in enzymatic reactions. Designed for professional use, it meets rigorous standards for purity and activity, making it a reliable choice for your processing or research needs.

Product Type	Proteolytic Enzyme
--------------	--------------------

Physical Properties

Physical Form	Powder
Color	White

Applications

Common Applications	Biochemical Research, Industrial Processing
---------------------	---
