

Perforated Metal Drainage Basket

This is a durable metal basket with a perforated bottom. It is designed with mounting holes and a glossy finish for diverse applications.

Product Overview

Industrial Drainage Solution

This perforated metal drainage basket is engineered for durability and efficient fluid management in industrial or utility environments. Featuring a robust rectangular design with rounded corners and a precision-perforated bottom, it ensures optimal drainage and ventilation performance. The unit is equipped with integrated side mounting holes, allowing for secure installation and easy integration into existing infrastructure.

Physical Characteristics

Shape	Rectangular with rounded corners
Surface Finish	Smooth, glossy
Material	Metal

Features

Key Features	Perforated Bottom, Drainage Optimized, Ventilation Capable, Mounting Holes
