Product Overview

High-Efficiency Peripheral Water Pump

The QB series peripheral pump is a compact and reliable solution designed for pumping clean water free of abrasive particles. It excels in domestic applications, including water supply from wells, irrigation, and pressure boosting for small to medium-sized surge tanks. Known for high-pressure output at lower flow rates, this pump offers an economical and easy-to-maintain design for residential and light commercial needs.

Technical Specifications

Performance Metrics

36 L/min

Max Flow Rate

35 m

Max Head

8 m

Suction Height

0.5 HP

Power Output

Electrical Data

Parameter	Value
Voltage	220V
Frequency	50Hz
Rated Current	2.8A
Power Rating	0.37kW
Speed	2850r/min

Operational Details

Installation Notes

- Install a foot valve on the suction opening
- Install a check valve on the suction opening
- Only for use with clean water
- Suitable for non-chemically aggressive liquids

Compliance & Protection

IP44 Protection, Self-priming
