Product Overview

Professional Clean Water Transfer Solution

The QB-70 is a high-performance peripheral pump specifically engineered for the efficient transfer of clean water and pressure boosting in domestic, agricultural, and garden environments. Featuring a durable cast iron pump body and a resilient brass impeller, this unit is built to provide long-lasting, reliable service for water supply systems. Integrated safety features, including a thermal overload protector, ensure motor longevity by preventing damage from overheating during operation.

Technical Specifications

Pump Type	Peripheral
Pump Body Material	Cast Iron
Impeller Material	Brass
Safety Features	Thermal Overload Protector

Applications

Primary Applications

- Domestic Water Supply
- Garden Irrigation
- Pressure Boosting Systems
- Small Farm Water Transfer

Operational Requirements

Compatible Fluids	Clean water without abrasive particles
