

Peripheral Water Pump for Fluid Transfer

This peripheral pump is designed for various fluid transfer applications. Its compact design allows for easy installation in confined spaces.

Product Overview

Reliable Fluid Transfer Solution

This peripheral water pump is engineered for efficient fluid transfer across both domestic and industrial environments. Its robust motor and specialized impeller design ensure consistent performance for water boosting, circulation, and liquid transfer tasks. The compact form factor is specifically designed to facilitate straightforward installation, even in confined spaces where footprint is a concern.

Technical Specifications

Design Features

- Robust motor construction
- High-efficiency impeller
- Compact, space-saving design
