

Peripheral Water Pump for Irrigation

High-performance peripheral pump designed for efficient water transfer. Its robust construction ensures long-lasting reliability for drainage and irrigation.

Product Overview

High-Performance Irrigation Solution

This high-performance peripheral pump is specifically engineered for efficient water transfer in agricultural and irrigation applications. Built with a robust construction, it ensures long-lasting reliability even in demanding environments. It serves as an ideal solution for drainage, irrigation tasks, and general water pumping requirements.

Technical Specifications

Pump Type	Peripheral Pump
-----------	-----------------

Applications

Primary Uses	Agricultural Irrigation, Water Drainage, General Water Transfer
