

Permanent Magnet Frequency Conversion Food Waste Disposer

This food waste disposer utilizes grinding technology to process food waste into fine particles, which are then mixed with water to prevent sedimentation. It features antibacterial components and a blade-free grinding treatment for enhanced safety and hygiene.

Product Overview

Advanced Food Waste Management

This permanent magnet frequency conversion food waste disposer offers a high-performance solution for modern kitchens, utilizing advanced grinding technology to process waste into fine particles. Designed with safety and hygiene in mind, the unit features blade-less grinding and an integrated antibacterial agent to minimize odors and prevent secondary pollution. With a focus on durability and efficiency, this system provides a reliable, one-touch disposal method that helps keep drains clear and reduces household landfill waste.

Technical Specifications

Motor Power

400 W

Power Output

Motor Type

Permanent Magnet BLDC

Key Features

Warranty

5 Years Warranty

Safety & Hygiene

Blade-less Grinding, Antibacterial Treatment, Pneumatic Switch

Operational Details

Grinding Technology

- Anti-sedimentation water flow
- Fine particle processing
- Frequency conversion control
