

Permanent Makeup Pen with Brushless Motor

This permanent makeup pen features a powerful yet quiet brushless motor with zero vibration. Its portable design and stable needle performance make it suitable for professional permanent and semi-permanent makeup applications on brows, eyes, lips, and tattoos.

Product Overview

Professional Precision Instrument

This advanced permanent makeup pen features a revolutionary brushless motor system, delivering high power with zero noise and minimal vibration. Designed for professional use, it offers superior needle stability and a comfortable, ergonomic grip that reduces fatigue during extended sessions. With a long-lasting internal lithium battery and a unique magnetic swing structure, it provides the reliability and performance required for brow, eye, lip, and tattoo applications.

Suitable Applications	Brows, Eye, Lips, Tattoo

Technical Specifications

Motor Power	30 W
Motor Service Life	10000 hours
Battery Runtime	8 hours
Needle Fixation Type	Spiral port

Performance Comparison

Comparison with Standard Brush Devices

Feature	Brushless Device	Standard Brush Device
Operating Principle	Magnetic swing + reciprocator	Eccentric wheel + plastic bar
Motor Type	Brushless (30W)	Brush (15W)
Needle Stability	High (Self-lubricating)	Low (Unstable after 20 days)
Noise Level	Low (Consistent)	High (Increases with wear)
