

Personal Air Purifier with Hanging Mechanism

This personal air purifier is compact and designed for use in cars, closets, or small rooms. It utilizes an internal filtration system to remove dust, pollen, and odors, and is powered by a rechargeable USB battery.

Product Overview

Compact Personal Air Purification

This portable air purifier is designed for personal use, offering a lightweight and versatile solution for cleaner air. Featuring a unique hanging mechanism, it can be easily suspended in cars, closets, or small rooms. The device utilizes an efficient internal filtration system to remove dust, pollen, and odors while operating quietly for minimal disruption.
