

Personal Electric Fan with Adjustable Settings

This compact electric fan is designed for personal use. It features adjustable settings, a protective grille, and a stable base.

Overview

Compact Personal Cooling Solution

This portable electric fan is engineered for localized cooling in personal spaces such as offices, dormitories, and home workstations. Featuring a durable plastic construction and a protective grille, it balances safety with consistent airflow. The unit includes adjustable settings and a clear power indicator light, ensuring ease of use and operational transparency for the user.
