Overview

Sleek, modern design with an intuitive LED control interface.

Advanced Personal Air Comfort

This versatile personal evaporative air cooler and humidifier is designed to create a comfortable, healthy environment in your home or office. Featuring advanced UV sterilization technology and intelligent constant humidity control, it ensures the air you breathe is clean, moisturized, and refreshing. With a silent operation design, convenient top-filling water access, and a built-in essential oil box, it offers a seamless blend of functionality and relaxation.

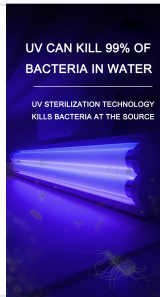

Performance & Capacity

Designed for comfort with silent operation, sleep mode, and timing functions.

Water Tank Capacity	5 L
Mist Output	300 ml/h
Power Consumption	28 W
Noise Level	<36db
Runtime per Fill	16 hours

Features & Functionality

Integrated UV sterilization ensures 99% of bacteria are eliminated for cleaner air.

Convenient top-fill design for easy water replenishment.

Control Methods

- Infrared Remote Control
- LED Touch Display
- Manual Mist Adjustment

Key Features

UV Sterilization, Essential Oil Compatible, Intelligent Humidity Control, Sleep Mode, Water Shortage Protection, Radiation-Free

Technical Specifications

Compact and portable design perfect for desk or bedside use.
