Product Overview

Personal Comfort Solution

This portable evaporative air cooler utilizes advanced water evaporation technology to transform hot, dry air into a cool, moist, and fresh breeze. Designed for personal microclimates, it offers a more energy-efficient and eco-friendly alternative to traditional cooling systems. Its lightweight, USB-powered design makes it the ideal companion for desks, bedside tables, or study areas, while dual functionality allows it to serve as a humidifier during winter months.

Key Features

Operational Modes

- 3 Fan speeds
- 2 Timer settings
- Humidifier mode

Integrated Lighting

7-Color LED • Night light mode

Cooling Technology

Evaporative cooling with 28 evaporation pads for increased surface area

Technical Specifications

Power Source

USB Cable

Eco-Friendly Features

Energy Saving, Freon-free, Non-toxic

Usage Scenarios

Recommended Use

- Bedside tables
- Computer desks
- Laboratories
- Classrooms
- Outdoor spaces
