

Personal Space Electric Heater

This compact electric heater is designed for personal space heating. It features a black grill for efficient heat distribution, adjustable thermostat control, and a safety shut-off mechanism.

Product Overview

Compact Personal Heating Solution

This electric heater is designed to provide efficient, targeted warmth for personal spaces and small to medium-sized rooms. Utilizing advanced heating methods including resistance, induction, and infrared radiation, it ensures rapid and consistent temperature control. The unit is built with a durable white plastic casing and features an integrated safety shut-off mechanism for peace of mind during operation.

Technical Specifications

Heat Distribution Methods

- Direct Contact
- Warm Air Convection
- Far Infrared Radiation

Heating Technologies

Resistance Heating, Induction Heating, Arc Heating, Electron Beam Heating, Infrared Heating, Medium Heating

Safety & Design

Safety Features

Safety Shut-off Mechanism • Ventilated Casing

Design Highlights

- Compact form factor
- Adjustable thermostat control
- Efficient black distribution grill
- Optimized airflow ventilation
