

# Personal Space Fan Heater

This compact fan heater is designed for personal space heating. It features a circular design with a protective metal grill and a top-mounted control knob.

## Product Overview

### Compact Personal Heating Solution

This personal space fan heater utilizes advanced ceramic PTC heating technology to provide efficient and consistent warmth. Designed for versatility, it features two distinct heat settings and an electronic adjustable thermostat to maintain your preferred comfort level. With built-in safety features like a manual reset switch, it is an ideal, reliable choice for small rooms or office environments.
