

Personal Space Heater with Adjustable Settings

This compact heater is designed for personal space heating. It features a front grill to direct airflow and a control knob for adjusting heat settings.

Product Overview

Compact Personal Heating Solution

The HT-288 is a compact and portable heater engineered specifically for personal space heating applications. Designed with a durable plastic housing, it features an adjustable control knob for precise heat management and a front grill optimized for efficient airflow direction. This unit is an ideal choice for maintaining comfort in small rooms, office environments, or under-desk settings, incorporating a safety thermal cut-off to ensure reliable operation.
