

Personal Space Heater with Digital Display

This space heater provides localized warmth with a ceramic heating element for rapid heating. It includes a digital display for temperature settings and a protective grill for safety.

Product Overview

Efficient Personal Heating

This personal space heater features advanced ceramic heating technology for rapid and consistent warmth in home or office environments. Designed with user safety at the forefront, it utilizes a self-regulating PTC element and fire-resistant materials to prevent overheating. With intuitive digital controls and a convenient remote, this unit offers precise temperature management and flexible operation.

Performance & Control

Oscillation	90 degrees
Timer Duration	1-8 hours
Control Options	Digital Display, Remote Control

Safety Features

Heating Technology

PTC Ceramic • Self-Regulating

Safety Design

- Cool-touch exterior
- Contact safety (paper/fabric safe)
- Overheat protection

Housing Material	Fire-resistant PBT
