Product Overview

Compact Personal Heating Solution

This PTC fan heater provides efficient, rapid warmth through advanced ceramic heating technology. Designed for versatility, it features multiple heat settings, automatic oscillation, and whisper-quiet operation to suit office or home environments. With built-in safety mechanisms like tip-over protection and overheat sensors, it is a secure and reliable solution for personal climate control.

Technical Specifications

Power Consumption

1500 W
Max Power

750 W
Low Heat

Input Voltage

AC220-240V 50/60Hz

Heating Element

PTC (Positive Temperature Coefficient) Ceramic

Features & Safety

Operating Modes

- Cool Fan Function
- 750W Low Heat
- 1500W High Heat

Safety Protections

Overheat Protection, Tip-over Switch, Thermal Fuse

Control System

Touch Switch Control

Compliance

Standards & Compliance

CE • GS • EMC • LVD
